

Two-hundred seventy-two local, state, federal, nonprofit and academic leaders from all across the political spectrum and throughout the country support the following Moneyball for Government principles.

Moneyball for Government Principles

Government at all levels should help improve outcomes for young people, families, and communities by:

- 1) Building evidence about the practices, policies, and programs that will achieve the most effective and efficient results so that policymakers can make better decisions;
- 2) Investing limited taxpayer dollars in practices, policies, and programs that use data, evidence, and evaluation to demonstrate how they work; and
- 3) Directing funds away from practices, policies, and programs that consistently fail to achieve desired outcomes.

Moneyball for Government Book

Results for America has released a bipartisan national best-selling [*Moneyball for Government*](#) book to help change the way government works so that budget, policy, and management decisions by governments at all levels are informed by the best possible data, evidence about what works. The second edition of [*Moneyball for Government*](#) features a new bipartisan chapter about the importance of using data and evidence to drive U.S. foreign assistance.
